KEY QUALIFICATIONS

- Computer Science professional with Master of Science and experience teaching and researching computer science.
- Ran labs as a teaching assistant, helping students learn a variety of topics including Computer Programming I, Website Technologies, Computer Organization.
- Studied computer science education under a National Science Foundation grant and submitted a paper to the Computer Science Education journal.
- Lifelong volunteer currently assisting a food network with technology tasks.

COMMUNITY ENGAGEMENT AND LEADERSHIP

Current Community Engagement and Leadership | Miracle Food Network, Ferndale, WA

OCTOBER 2025 TO CURRENT

- Volunteer for 4.5 hours a week.
- Assist with receiving deliveries and preparing food for hubs.
- Occasionally help with technology tasks like configuring VoIP, laptop repair, and updating the website.
- "<https://www.miraclefoodnetwork.org/>".

Graduate Community Engagement and Leadership | Bellingham, WA

JANUARY 2023 TO JUNE 2025

- Member of both Western Washington University's University Choir and the Bellingham Unitarian Fellowship choir from Fall 2023- Spring 2025.
- Founding member of Western Washington University Robotics Club from Fall 2024-Spring 2025.

Undergraduate Community Engagement and Leadership | Des Moines, IA

SEPTEMBER 2016 TO MAY 2020

- Programmer of Drake University Extracurricular Game Development Group 2018-2020.
- President of Drake University Tae Kwon Do Club 2018-2020, earned 1st Dan Black-Belt.
- Volunteer at Oaken Acres Wildlife Refuge and Rehabilitation Center for Summer of 2017 "<https://www.oakenacres.org/>".
- Assisted refugees learn English skills at Lutheran Services in Iowa for five weeks in Fall of 2017 "<https://lsiowa.org/>".

High School Community Engagement and Leadership | DeKalb, IL

SEPTEMBER 2012 TO JUNE 2016

- Member of High School choir for four years.
- Member of Madrigals choir royal court and performed at assisted living facilities from Freshman to Junior year.
- Assisted students with developmental disabilities in physical education during Senior year "<https://dhs.d428.org/>".

PROFESSIONAL EXPERIENCE

General Laborer | Express Employment, Bellingham, WA

MAY 2026 TO CURRENT

- Take on and respond to new assignments as needed.
- Experience navigating and working in a warehouse environment.

CS Research Assistant | Western Washington University, Bellingham, WA

JANUARY 2024 TO JUNE 2025

- Played a pivotal role in advancing knowledge within the field of CS education research.
- Conducted a literature review, interviews, and performed data analysis.
- Completed necessary tasks for research and contributed ideas to the research.

CS Graduate TA | Western Washington University, Bellingham, WA

JANUARY 2023 TO DECEMBER 2023

- Tasked with running labs for undergraduate students and grading assignments.
- Expected to quickly understand and teach new topics.
- Required the ability to balance workload with graduate degree studies.

Electrical Department Assistant Manager | Menards, DeKalb, IL

- Trained new employees on protocols and expectations.
- Collaborated with library staff to ensure patron satisfaction.
- Communicated effectively with individuals from diverse backgrounds.
- Managed library inventory of resources.

EDUCATION

M.S. in Computer Science | Western Washington University, Bellingham, WA

JANUARY 2023 – JUNE 2025

- GPA: 3.72
- Research: Studying the Computer Science Education Pipeline and Simulating Classroom Behavior.

B.S. in Computer Science / Minor in English | Drake University, Des Moines, IA

SEPTEMBER 2016 – MAY 2020

- Graduated Magna cum Laude with Honors
- GPA: 3.73
- Senior Thesis: Connecting machine learning and tools for the differently-abled.
- Received Drake University Presidential Scholarship (Academic Merit).

Study Abroad | Morocco, Spain and Portugal

JANUARY 2019

- Received Levin International Studies Scholarship.
- Explored the cultures of Morocco, Spain, and Portugal with the goal of developing global leadership skills.
- Studied Spanish a few weeks prior to leaving as part of the honors program.

SPECIALIZED SKILLS

Technology Skills

- Expertise in C++ and Python.
- Experience in front-end languages and software like Vite, REACT, Javascript, HTML, and CSS.
- Experience with many languages including C#, C, Haskell, MySQL, Prolog, and more.
- Broad experience in Computer Science topics: Operating System, Computer Organization, Automata and Formal Language Theory, Robotics, Simulation, Deep Learning, Computer Vision, Machine Learning, etc.
- 3D printing and CAD experience in Solid Edge.
- Experience in embedded programming with Arduino.
- Strong Windows, Linux, and Git knowledge.
- Experience with MATLAB including three certificates in Core MATLAB skills, Machine Learning, and Deep Learning Image Processing:

International Skills

- Lived abroad in Kenya, England, Scotland, and Ireland for four months in 2003.
- Visited Costa Rica for two weeks in the Summer of 2009.
- Studied Spanish Freshman, Sophomore, and Junior year of high school.
- Briefly studied Spanish before traveling to Morocco, Spain, and Portugal January 2019.
- Participated in choir performances in Canada twice during 2023-2024.
- Visited Seoul, Korea for a week during the summer of 2025.

MAJOR PROJECTS

Whatcom Food and Shelter | Personal Project

12/2025 – 03/2026

- Website designed to help people in Whatcom county locate food giveaways and shelter opportunities.
- Designed with Vite and REACT + Javascript, hosted on google firebase.
- Uses a small database to display opportunities in multiple formats including a list, a map, and a calendar.
- Incorporates Claude AI agent to search for new opportunities weekly.
- “<https://whatcom-food-and-shelter.web.app/>”

Pre-service CS Teacher Pathways | Collaborative Research

12/2023 – 06/2025

- Project examining the current pathways available for pre-service teachers interested in teaching CS.
- Performed a comprehensive literature review in an underexplored domain, as well as interviews and data analysis.
- Funded by the National Science Foundation grant.
- “<https://noahdoudenwwu.github.io/noahdouden.github.io/csed.html>”

Mini-drone Object Tracking Control | Collaborative Project

02/2025 – 06/2025

- Developed software to control a Crazyflie drone using an Aruco tag.
- Designed a program to have a camera keep track of the drone and an Aruco tag, then send controls to a drone so it remained near the tag.
- Utilized state estimation, computer vision, and Kalman filtering.
- “<https://noahdoudenwwwu.github.io/noahdouden.github.io/minidrone.html>”

Classroom Simulation ML | Individual Research

12/2023 – 06/2025

- Project aiming to generate realistic simulations of a classroom environment using Unity's Mlagents package.
- Developed study from the ground up, involving creating and testing a research question under the guidance of a research advisor.
- Examined a novel use for ML-agents as a tool for autonomous complex simulation.
- “<https://noahdoudenwwwu.github.io/noahdouden.github.io/rlagents.html>”

Drake Relays Companion App | Collaborative Project

01/2020 – 05/2020

- A companion app for the Drake relays, a yearly event at Drake University.
- Designed to help students navigate different events at the Drake Relays.
- Written in Kivy, a python framework for mobile apps, and MySQL. The database was hosted using Amazon Web Service.
- “https://github.com/Noah-Dougen/CapstoneProject/tree/master/CS_Capstone-master”
